

What You'll Find in the NCF Cattle Report:

The University of Florida IFAS Extension program provides the latest, unbiased, scientifically sound, educational materials to the clientele. The North Central Florida Cattle Report was developed to provide a peak at some interesting articles related to your industry in a format that allows you to quickly decide if you want to continue reading. Not only will you find up-to-date articles, you will also find internet links to excellent resources and a market summary for the North Central Florida Cattleman.

2014 Across-Breed EPD Adjustment Factors Released

When using EPDs, bulls from one breed cannot be compared to another unless an adjustment factor is used. Since 1993, scientist from the U.S. Meat Animal Research Center in Clay Center, Nebraska have released adjustment factors for growth traits and maternal milk traits for across-breed expected progeny difference (AB-EPDs). The 2014 table includes factors for eighteen breeds and was released at the Beef Improvement Federation (BIF) Annual Meeting in Lincoln, NE in late June. For more information, click here: [Beef Magazine, June 30, 2014](#).

Animal Feed vs. Human Food

- The world population is expected to grow from 7 billion in 2011 to 9 billion by 2050 (28.6% increase).
- The Food and Agriculture Organization (FAO) predicts the demand for food, fuel and fiber will increase by 60% by 2050.
- This in part is due to the improving economies of China and India. As per capita income increases, the demand for animal source foods such as milk, meat and eggs also increases.
- Many of the feedstuff fed to cattle are suitable for human consumption.

Hot Cattle Market Brings Producers Tough Decisions

I have heard several questions concerning 1.) Should I sell my calves at weaning?, And 2.) What is the most economical alternative for replacement females? Dr. Curt Lacy, Extension Economist/Livestock with the University of Georgia has developed a Marketing Alternative Calculator that producers can use to evaluate up to four different marketing alternatives. This spreadsheet can forecast feeding costs, and market prices. For more information, click here [Southeast Cattle Advisor, July 15, 2014](#).
